

eINDIA2007 FEEDBACK

e-INDIA2007 is one of the few events of this size, which in 3 years of its organisation has reached this level of participation and management which is comparable to any international standards. The service and hospitality provided to exhibitors and presence of your team on the spot was unique to this event.

The conference was very well organised. The themes were comprehensive. It was successful in helping the participants gain insight into various implications of ICT.

I would suggest that you target more foreign delegates to attend this conference. Targeting more American, Japanese and Singapore universities and organisations will add a little more glamour to eINDIA conference.
